The course requires English language skills corresponding to English 6 (i.e. IELTS 6.5 or TOEFL 90/575 or an equivalent test).

Tuition fees do not apply for exchange students nor for international students who are citizens of the EU, EEA or Switzerland.
To be able to eat dinner with students from countries such as South Africa, Israel, Canada and Spain, all at once is a lifetime experience. Also, spending my summer in Kalmar has been wonderful! The warm weather made swimming in the Baltic Sea a truly great experience and a good way to cool off together with my newfound friends.

Mitchell, USA

The classes were incredibly interesting and played a big role in my great experience of Summer Academy. The relationship between students and professors is informal which motivates you to ask questions and participate in discussions. Moreover, the classes are incredibly creative with different forms of teaching.

Farah, Russia
Linnaeus University Summer Academy

JULY 10 – AUGUST 14, 2020

Linnaeus University Summer Academy offers an international, intercultural and interdisciplinary study environment – unique among its kind in Sweden.

The courses within our Summer Academy originate in Swedish culture and an innovative mindset. They are workshop-oriented and have a strong student focus. Courses are offered at undergraduate level. The Summer Academy runs in the beautiful medieval city of Kalmar, one of our study sites. All courses are 7.5 credit full-time courses, taught in English and many have general entry requirements.

The combination of lectures and workshops within the student's own course and weekly interdisciplinary sessions for all participants at the academy, provide opportunities for new contacts and cultural insights – both from other students and from local and global business representatives. An extensive social programme will contribute to an increased knowledge of Swedish culture and society. The programme offers organised day-trips and weekend excursions as well as outdoor and sports activities and cultural events.

Study, enjoy Sweden and grow as a person – join our Summer Academy!
The region as a base, the world as a stage!

Linnaeus University has taken its name from Carl Linnaeus, the most famous and world-renowned Swedish scientist of the last few centuries. Carl Linnaeus was curious and innovative – the key values at our university. While the university is firmly rooted in the Småland region of southern Sweden where Linnaeus was born, our activities, like his, have no boundaries.

Linnaeus University has a long tradition of offering degree programmes and courses in English, attracting more than 1,800 international students every year. In the summer of 2014, we introduced Linnaeus University Summer Academy.

As a student participating in our Summer Academy you will get the opportunity to achieve unique academic experience that will enhance your CV and your further career. You will also make new contacts and gain cultural insights from Swedish students as well as international students and students with different disciplinary backgrounds. It will take place in a season when the town of Kalmar, and Sweden as a whole, is at its very best.

We welcome you to participate in Linnaeus University Summer Academy – a place that makes people grow!

Ann-Charlotte Larsson,
Deputy vice-chancellor

Anneli Andersson,
Operational manager
**Destination Management**

**7.5 CREDITS**

Tourism management is crucial in order for tourism to be beneficial and sustainable. The aim of the course is to conceptualize and analyse the complexity of destination management, digitization and the destination value web. The course provides a blend of theoretical and practical applications with an emphasis on tourism theory.

Beginners’ Swedish, part 1

7.5 credits
This course will equip you with basic knowledge of Swedish. You will learn some of the basic vocabulary and the key structures of Swedish, but you will also start to practice the language and your communicative abilities. After the course, there are several continuation courses in Swedish at Linnaeus University.

Entry requirements:* General entry requirements
Main field of study: Swedish
Tuition fee:** SEK 10,625

Introduction to Applied Internet of Things

7.5 credits
The Internet of Things (IoT) devices transfer data over a network without human intervention. Today everything including mobile phone, smart TV, fridge or washing-machine is (or can be) connected. It is even possible to measure the humidity of the soil in your garden or to get a notification when the mail has arrived.

In this course, students learn how to build an IoT device connected to the Internet, starting from an idea to a concrete application. Students learn programming and 3D-printing. The course is applied – students spend a lot of time working with sensors, IoT devices, and programming.

Entry requirements:* General entry requirements
Main field of study: Computers Science, Technology
Tuition fee:** SEK 16,250

Energy and Sustainable Development

7.5 credits
This course focuses on our production chains in society, sustainable development, energy and footprint. Engineers have a key role in design of products. However, other competences contribute in the formation and development processes. Together they address market needs and contribute to the development of a sustainable future for our society.

Entry requirements:* General entry requirements and specific entry requirements: 60 credits in any academic subject
Main field of study: Environmental Engineering, Energy Technology
Tuition fee:** SEK 16,250

* The course requires English language skills corresponding to English 6 (i.e. IELTS 6.5 or TOEFL 90/575 or an equivalent test).
** Tuition fees do not apply for exchange students nor for international students who are citizens of the EU, EEA or Switzerland.
Close to everything
Linnaeus University pursues teaching and research in Kalmar and Växjö in south-east Sweden. Both cities are easily reached by car, bus, train or plane. There are direct flights from Stockholm as well as train connections with Stockholm and Copenhagen several times a day.

Estimated travelling time to Kalmar (by train):
Copenhagen (Denmark) – 3.5 hrs
Stockholm – 4.5 hrs
Malmö – 2.5 hrs
Gothenburg – 4 hrs
