Papers in International Conferences

Linnaeus EcoTech International Conference held in Kalmar and organized by the Environmental Science and Engineering Group (ESEG) every second year.

Since 2008 when the project started, the results obtained from the research activities have been presented in the form of several conference papers by researchers, PhD and MSc students at the International Conference Linnaeus EcoTech held in Kalmar every second year by the ESEG group.

Figure 1. International Conference Linnaeus EcoTech 2012: Closing ceremony with members of the project (two professors, PhD students and secretary), which has participated in the Conference organization team every second year.

From 2008 (beginning of the project) up to now, conference papers have also been presented (mostly oral presentation) in other international events held in Sweden, Russia, Brazil, USA, Italy, New Zealand, Iran, Poland, Austria, Portugal, Germany and India. The papers with results directly obtained from KK-Stiftelsen project are presented in List 1: Papers showing results of research activities related to KK-Stiftelsen project are placed in List 2: (research projects implemented for instance, in Brazil applying similar methodological approach and lessons learned in Kalmar region, as well as research projects developed parallel to KK-Stiftelsen dealing with risk of ignition in storage piles of both solid waste and wood residues such as wood chips, etc.).
List 1 (results directly obtained within the Project):

8. Kaczala, F.; Solomon, P.S.; Marques, M; Hogland, W.; Granéli, E. Os efeitos causados na microalga Scenedesmus subspicatus pelas águas de escovoamento superficial de uma área industrial utilizada para estocagem de madeira (in Portuguese) In: 26o Congresso

List 2 (Research related to KK-Stiftelsen project in Sweden or application of principles, methodological approach, lessons learned during the project in other parts of the word):
